

Your Wireless Presentation Connector

KLIK Boks CLASSIC KB-801

The KLIK Boks wireless presentation connector allows users to stream content from their computer or mobile device to a display or projector without cables. With both wired and wireless network connectivity on-board, the KLIK Boks integrates with existing infrastructure, allowing seamless availability across an organization. Combining a high-performance system-on-a-chip (SoC) with class-leading client software, KLIK delivers fluid HD video performance with better than CD quality audio. Key features include:

- Stream from Win/Mac/iOS/Android without installing software
- 3 levels of access for optimal security; Open, Password and Managed access
- Wired & Wireless network connectivity plus Virtual AP mode
- Comprehensive HDMI, VGA, Analog & Digital Audio connectivity
- Share a presentation remote or keyboard with Wireless USB feature

Transform any meeting room, classroom or presentation facility with KLIK Boks!

Stream without installing software!

Unmatched mobile connectivity!

Client Connection Options

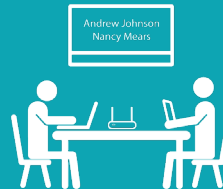

Open Access

Start using the KLIK Boks immediately with Windows, Mac, iOS and Android, without dongles, adapters or the installation of an app.

Password Access

Want more security and control? Install the free Knkt app and get the benefit of security password support with on-screen annotation and whiteboard features (Win/Mac).

Managed Access

The ultimate in control for classrooms or busy meeting rooms, Managed Mode allows a Moderator to control who's up next, with the bonus of remote screen preview.

Key Features

Start streaming from Mac, Windows, iOS and Android without installing an app.

Manage multiple presenters easily with screen preview in Conference Mode.

KLIK makes its own hotspot or connects to a network wirelessly.

Connect to any HD display with EDID compliant HDMI for a full 1080p image.

KLIK features a powerful media player that plays music, images or video.

Analog and Digital audio outputs deliver high-fidelity sound.

Compatible with legacy displays and projectors that have VGA video inputs.

Mark up content right on the screen, then save and print notes.

Mark up content right on the screen, then save and print notes.

Share a wireless presentation remote or keyboard and mouse, just like magic.

Boost meeting productivity with KLIK's built-in whiteboard feature.

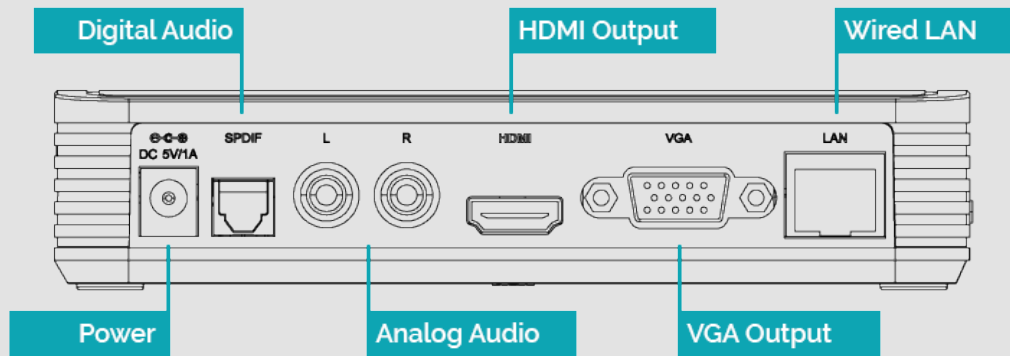

KLIK is mobile-friendly with native support for iOS and Android devices.

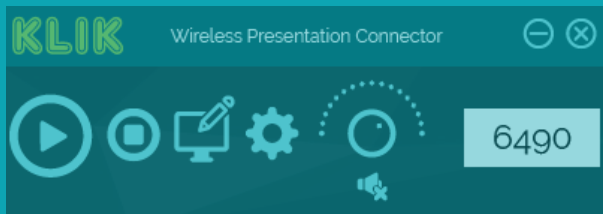

KLIK makes its own hotspot or connects to a network wirelessly.

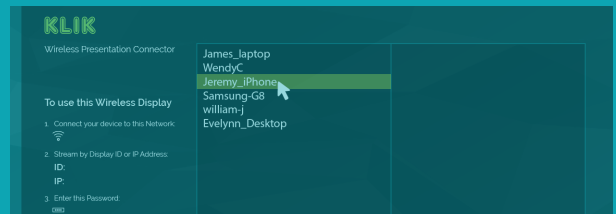

Extensive Connectivity

Intuitive Operation

KLIK's desktop interface makes it simple for users to connect and start presenting right away!

Manage multiple presenters in Managed Access mode and switch between them in an instant!
